Chief Officer, VLCC Crude Oil Tankers | Founder, VaultCrew | Building India's Crew Compliance Platform for RPSL Manning Agencies | 19 Years Maritime Operations
Delhi, India

Summary

19 years at sea teaches you many things. One of them is this: the paperwork kills careers just as often as the ocean does.

I have spent nearly two decades on crude oil tankers, VLCCs carrying 300,000 tonnes of cargo across every major trading route in the world. I have sat through SIRE inspections, PSC examinations and ISM reviews. I know what it means to have every document in order before the inspector walks aboard.

Manning agencies in India are facing the same pressure, but most of them are managing seafarer certificates, bank guarantees, and DGS compliance deadlines on Excel sheets and WhatsApp groups. When the DGS surveyor arrives for the annual RPSL inspection, the scramble begins. Records are missing. Certificates have expired. Bank guarantees are not commensurate with current seafarer strength. The result: show cause notices, suspensions, and in the worst cases, license cancellations.

More than 294 RPSL-licensed agencies have already lost their license. 87 more are currently suspended or blocked.

I am building VaultCrew, India's first crew compliance platform built specifically for RPSL-licensed manning agencies. Every seafarer certificate tracked. Every agency document monitored. Every DGS audit checkpoint covered. Automated alerts before anything expires. One-click compliance export when the surveyor walks in.

I am not a developer who read about maritime compliance in a report. I have 19 years of knowing exactly what a DGS surveyor looks for and exactly what agencies are missing.

If you run a manning agency, work in crew management, or know someone navigating the DGS inspection cycle, I would like to connect.

Experience

VaultCrew

Founder and CEO

March 2026 - Present (7 months)

India

Building India's first crew compliance platform for RPSL-licensed manning agencies.

VaultCrew helps manning agencies track seafarer certificates, manage agency compliance documents, and walk into every DGS annual inspection fully prepared, with zero scrambling.

Core platform features:

- Seafarer certificate tracker with 60/30/14-day automated alerts
- Agency document vault covering Bank Guarantee, RPSL license, MLC Financial Security, and Manning Agreements
- 48-point DGS audit readiness checklist mapped to the official RPSL inspection schedule
- One-click compliance export report for inspection day

Currently onboarding pilot agencies. If your agency needs to get audit-ready before the next DGS inspection, reach out at angad@vaultcrew.in

Synergy Marine Group

Chief Officer

October 2025 - Present (1 year)

International Waters

Chief Officer aboard NAVE UNIVERSE, a VLCC crude oil tanker under Synergy Marine management.

Responsible for cargo operations, stability management, deck maintenance, crew supervision, and full compliance with ISM, MARPOL, and STCW requirements.

SUNTECH SHIP MANAGEMENT PTE. LTD.

Chief Officer

March 2019 - June 2025 (6 years 4 months)

International Waters

Six years as Chief Officer across seven vessels, including crude oil tankers, product tankers, and chemical carriers. Largest vessel: MT ATHERINA at 319,471 GRT.

Highlights:

- Zero safety incidents across the entire tenure
- Led multiple successful SIRE, CDI, and PSC inspections
- Managed cargo operations for complex multi-grade chemical and crude oil parcels
- Coordinated crew changes across Indian, Filipino, and Eastern European seafarers in compliance with STCW and flag state requirements

Wallem Group

Progressive Maritime Career, Deck Cadet to Chief Officer

January 2007 - November 2018 (11 years 11 months)

International Waters

Eleven years with Wallem Ship Management, progressing from Deck Cadet through Officer of the Watch to Chief Officer.

Built the operational foundation across tanker and PCC vessels, covering ISM implementation, cargo planning, watchkeeping, crew management, and port state control compliance.
